

VISUAL REFERENCE · COMPILED FROM TAITO.AI

Taito.ai

Design manual

Color, type, components, imagery, and layout patterns observed on taito.ai, with the official palette and naming rules from taito.ai/brand.

PRINCIPLES

Warm neutrals, direct copy, no decoration for its own sake.

Warm neutral, not cold tech

Black, stone, and off-white replace the blue/gray SaaS default. No accent color is used site-wide — contrast and photography carry emphasis instead.

Plain, matter-of-fact copy

Headlines state what the product does — "Run people ops on autopilot," "From zero to payroll, no manual steps" — short, literal, no marketing flourish.

Real product, real people

Documentary workplace photography and actual product UI screenshots stand in for illustration or stock icons — nothing invented, nothing abstract.

COLOR PALETTE

A warm-neutral palette

Black, stone, and off-white. Ink for the wordmark on light surfaces, Surface for the wordmark on dark surfaces.
Source: taito.ai/brand.

Ink
#0F0E0D

Primary text and wordmark on light surfaces.

Stone
#524F49

Secondary text, supporting marks, quiet metadata.

Surface
#FAFAF9

Page background and the wordmark on dark surfaces.

TYPOGRAPHY

Tight, functional grotesque sans

Exact font family unconfirmed — remote inspection of the site's live CSS wasn't possible. Recommended stand-in: `-apple-system, "Helvetica Neue", Arial, sans-serif` — a tight, low-contrast grotesque matching the letterforms seen on-site. Scale and weights below are read directly off the screenshots.

ROLE	SIZE	WEIGHT	LINE	SAMPLE
Display / H1	56px	600	1.05	Run people ops on autopilot
Section H2	36px	600	1.15	Grow your team, not your overhead
Card heading H3	22px	600	1.3	One product for all things people
Body	18px	400	1.55	Employee records, time off, attendance, contracts, pre-payroll, and performance, automated.
Eyebrow label	14px	500	1.4	WHY TAITO.AI?

BUTTONS & CTAS

One button, used consistently

Primary

Solid ink fill, off-white label, small radius — never a full pill. Used for every primary action, hero to footer.

Nav link

Pricing

Plain ink text, no underline at rest. Header and footer links share this treatment.

Inline text link

See how we handle your data

Underlined ink text for links inside body copy, e.g. security and FAQ sections.

IMAGERY

Real workplaces, real product — no illustration

Documentary photography

Candid shots of people at work — offices, streets, laptops. Warm, slightly muted color grade; never posed stock photography or graphic illustration.

Product screenshots

Actual app UI in a light browser/window frame with a soft drop shadow, floated over the section background rather than boxed in a hard card.

LAYOUT & SPACING

Generous whitespace, one column at a time

Measurements below are estimated from the screenshots' proportions, not live CSS — use as a working spec, confirm against production if pixel-exact values matter.

Grid

Content max-width	1280px
Columns (feature/card grids)	12, 3-col cards
Gutter	32px
Outer margin (desktop)	80-120px
Heading measure cap	~700-900px

Spacing scale

8	Icon-to-label gaps
16	Inline element spacing
24	Card internal padding
32	Grid gutters
64	Heading-to-body gap
120	Between full sections

ICONOGRAPHY

Thin line icons, ink only

People

Time off

Attendance

Docs

Permissions

Reporting

Icons sit directly on the page background — no chip, no fill color — sized small and paired one-to-one with a feature heading, never used decoratively.

SUMMARY

Restraint is the identity.

- Ink, Stone, Surface only. No added accent color.
- Photography and product screenshots, never illustration.
- Always "Taito.ai" — capital T, lowercase ai, joined by a period.
- One button style: solid ink, white label, small radius.
- Thin line icons, ink only, one per feature.
- Generous whitespace over dense grids.
